What's trending...

Whatever your style - whether you're after sleek, clutter-free family space or a splash of hotel-style chic - if you're planning to refresh your bathroom, we've got it covered. From statement enclosures to perfect storage solutions, we've selected the most inspiring new products from all over the world to bring you the latest trends at affordable prices.

Art Deco Re-invigorated

Industrial style isn't just about brick walls and vintage light bulbs. The popular trend's been reinvigorated with art deco tones for a touch of eclecticism. Gone are the typical factory-inspired bathrooms with exposed pipework and cold concrete.

Products with unique grooves and textures are set to be the biggest trend for 2023. The clever curves create a stunning visual effect to any bathroom design, cleverly reflecting light to invigorate your senses. Don't miss our new Velar Fluted Walk-in on page 314. Or, the Kyoto in Matt black on page 122 with the smoothest crafted grooves emulating calm sea waves - what could be more relaxing than that?

Calm Spaces

If you aren't a fan of dark moody rooms or clinical white, we have introduced a new colour pallet to our range in 2023, Cotton. The perfect balance of a warm, off-white which lends itself perfectly to the trend for natural textures is which will continue to grow in 2023. See the Kyoto cotton furniture range on page 122.

The new structure slate effect trays on page 374 are made from a mixture of natural minerals and resins, giving you a natural and luxurious feel underfoot. The Slate effect detailing gives this tray the look of natural stone, especially the white which is reminiscent of rocks you'd find on white sandy beaches.

Hotel at Home

Bring the holiday home this autumn with the addition of a wonderfully decadent free-standing bath. A centrepiece bath has the allure of a luxury spa-hotel, with a classic elegance that conjures up romance and indulgence, meaning every evening can feel like a night away.

The breath-taking Victoria freestanding bath on page 90 with its double-bow sides gives optimum comfort. Whilst the Napoli on page 94 instils a modern edge but remains characterful with its slender exterior and convenient tap deck.

Metallic Mood

Chrome has been the go-to finish for bathroom fittings for a long time but as consumers become even more style savvy we have seen trends for mixed finishes become more influential.

This year's shining star is matt grey, a muted dark metal inspired by the mineral zircon. Matt grey provides alluring dark accents, but still some high shine that is easy to clean. Pair with the mineral walk-in enclosures on page 224 or the Mineral shower packs on page 264 for a perfectly colour matched, luxe design.

Super Statements

Putting the 'tile' into 'versatile' - Aquawall makes revamping your space super easy and super stylish! Large format panels that are easily attached to any wall with adhesive and feature 8 different shades. A stylish alternative to traditional wall tiles, the panels are 100% waterproof and grout-free. The lack of grout lines creates a seamless look that promotes space and calm. With our new Aquawall colours on page 390 you can create the seamless look of large format tiles in iconic surfaces such as Carrera marble and black marble effect, Tuscany Gloss.

With clever crescent designs, the corner bath series are an ideal choice when it comes to maximising space in the bathroom. They easily slot in bathroom corners, provide families with a comfortable place to wash and enjoy bath time. If you like to relax while the bath fills up, you can kill time by perching on the integrated seating areas, which also double up as a space for toiletries. Then simply sit back and unwind in comfort and luxury.

Heating Collection

Comfort and relaxation should continue after you've stepped out of the shower. That means no arctic temperatures, no frozen floors, and definitely no soggy towels. Luckily, our heating has it covered with a choice of radiators, towel warmers and electric heating — giving you a little extra help when it comes to early starts and frosty mornings. Those in trend mode will love our selection of matt and metallic finishes, which require less maintenance, making them suitable for busy family homes. Our stylish variety of heating valves and elements also allow you to accessorise radiators to your taste.

Finding your BTU

A BTU (British Thermal Unit) rating refers to the amount of heat released each hour by a radiator or towel rail. The number specified is the number required to heat your room sufficiently. The higher the BTU, the higher the heat output — a BTU of 5154 (per hour) will accommodate large rooms, while a BTU of 603 is better for heating items found in bathrooms, such as towels.

Electric radiators are operated by a heating element that's measured in watts. Standard elements heat your space at an optimum temperature (usually between 65-80°); while thermostatic elements allow you to set a desired temperature and gradually works up to that temperature in increments.

We recommend consulting your plumber if you're not sure which BTU or heating element is best for your home.

Why choose an aluminium radiator?
Their incredible heat output makes them five times more efficient than steel.

This means aluminium radiators don't have to be switched on for long lengths of time to heat a room as they don't require as much water.

They're also surprisingly durable due to being less prone to rust, extending the life of your heating system.

Create Your Own

If our ready-made showers don't take your fancy, why not create your own design with these stylish mix-and-match separates?

To find your perfect set, simply choose from the following options:

1. 1-way shower valve + 1 wall or ceiling-mounted shower head or +1 slide rail kit
2. 2-way shower valve + slide rail kit + wall or ceiling-mounted shower head
3. 3-way shower valve + slide rail kit + wall or ceiling-mounted shower head + either a body jet or overflow bath filler tap

Please note: wall-mounted shower heads may require a shower arm.

Which shower valve to select...

Showers valves offer two functions: they control the flow of your water and the desired temperature.

- Mixer valves mix the hot and cold water flow. The temperature depends on how far you turn the knob or lever.
- Thermostatic valves automatically regulate your temperature, keeping it consistent if water is being used elsewhere in your property.
- All valves are fitted with an anti-scald shut-off device, keeping you safe in the event of no cold water.

Concealed Thermostatic Shower Valves

1-Way Shower Valves

Our 1-way thermostatic valves are managed with two controls. They still supply a single outlet, but one handle operates the temperature, while the other offers better flow management.

Structure Slate Trays

A designer tray with a difference. The structure slate effect shower trays are inspired by the outdoors, manufactured from a mix of natural minerals and resins to give you a natural and luxury feel underfoot. The slate effect detailing gives the tray the look of natural stone, while a matching waste brings contemporary style to bathrooms.

The slate effect trays have been manufactured with a low profile to create a seamless aesthetic that blends into your chosen flooring whether fitted on top of, or flush to the floor. For easy maintenance, these trays include a removable waste trap that makes an easy job of the cleaning.

Bathroom Lighting & Ventilation

Great lighting and ventilation is important in every room in the house, but it plays a particularly vital role in a bathroom. What is bathroom zoning?

Light fittings are assigned an 'IP rating' which indicates how much protection they provide against ingress of water. The bathroom area is divided up into 'zones' 0-3 with each zone having a minimum IP requirement that must be met if a fitting is to be installed in this zone.

Walls & Floors

When it comes to creating high impact in the bathroom, it's the details that make the biggest splash. Our Wall collection features items bursting with colour, patterns and textural interest, all designed to take the look of your bathroom to new heights.

You can inject touches of modernity with our new artisan and nature-inspired Aquafloor bathroom flooring, whilst our sustainable Aquawall panels create a seamless wall covering for bathrooms and kitchens.

Aquafloor provides a realistic look of stone or wood and is extremely hard wearing and resilient to daily wear and tear. The flooring is warm to the touch and is more sound absorbing than wood, laminate, and ceramic tile flooring. This understated flooring has innovative design features such as the patented 3L triple lock for a sophisticated approach to bringing the outdoors in.

Aquafloor features:

- 100% Water resistant
- Easy to install with drop down and lock system
- UV Resistant
- Suitable for walls
- Simple to cut with utility knife
