Tungstenite

Tungstenite is a substantially strong, hard wearing coating that is applied to the reverse of the bath, making it as durable as a cast iron bath but with the warmer and easier to maintain finish of acrylic.

BENEFITS - much stronger than acrylic, retains heat for approx 30 minutes longer than acrylic, improved bath stability & rigidity and increased durability resulting in a longer lifespan.

Look out for the Tungstenite logo

Bathroom Technology

Compatible with Oral-B/Braun* electric toothbrushes, this in-wall electric toothbrush charger can be installed just like a shaver socket, keeping your charger handy in the bathroom at all times.

- No wires in the bathroom
- Easy to install
- Acts as toothbrush holder at the same time as charging your toothbrush

*excludes iO and Plusonic series except the iO6

What is bathroom zoning?

Light fittings are assigned an 'IP rating' which indicates how much protection they provide against ingress of water. The bathroom area is divided up into 'zones' 0-3 with each zone having a minimum IP requirement that must be met if a fitting is to be installed in this zone.

Great lighting and ventilation is important in every room in the house, but it plays a particularly vital role in a bathroom. Choose the wrong light and you wind up going overboard with makeup or shaving in the shadows. Our lighting options include large flush ceiling lights or multi bulb bar lights, which create a daylight environment no matter the time of day.
